

Longstanton Flying site details

This site is not a club site, but electric model flying is allowed. The surface is usually suitable for hand launched models only.

The site is used by dog walkers who stay round the edges and there are no organised sports so it is usually OK for us to fly there at any time including weekends.

Park in the small layby by the cemetery (blue arrow) and walk 50 yards across the small bridge into the field marked red.
