

Model flying on Newmarket Heath

The Newmarket club used to fly on the heath, but don't any more because they have a new site near Mildenhall. However we (and the general public) can fly quiet electric models and free flight on the heath **after 1pm every day except for race days**.

I spoke to a nice chap who showed me the areas of public access and car parks etc. You can either fly on the North or South side. Parking (arrows) and flying areas are shown on the map below. Google link for blue car park [here](#)

These areas are massive and if you walk into the area you will be in a sea of grass cut to about 3 inches. Probably only suitable for planes with big wheels.

If members start using the site regularly, being quiet and relatively unobtrusive would be a good plan!!

Overleaf are a couple of photos showing the view looking North from the blue car park.

Here are 2 videos (Feb 2025) at the blue site and an FPV flight over the racecourse
